REF: Compatible Format for Submission of Administrative Rules

To Whom It May Concern:

As publisher of the Illinois Administrative Code (Code) and Illinois Register (Register), the Office of the Secretary of State, Index Department, must, occasionally, make adjustments to the requirements for submission of rules for publication in the Register. Over the past year, the Joint Committee on Administrative Rules (JCAR) and the Legislative Information Systems (LIS) has developed a new (Microsoft Word XP) system to track and maintain their version of the Administrative Code and the Illinois Register. The Secretary of State also has begun utilizing Microsoft XP to process the Register and the Code. Therefore, effective January 1, 2003, Index Department will no longer accept submissions of entries for the Register from state agencies unless it is on a Microsoft Word format. Any information that cannot be developed in Microsoft Word due to special characters or mapping will need to be scanned by the agency and embedded into the document.

If you have any questions, please feel welcome to contact me.

Thank you,

"Letter of Agency" shall mean the document described in Section 2EE of the Consumer Fraud and Deceptive Business Practices Act [815 ILCS 505/2EE] and referenced in Section 16-115A of the Public Utilities Act [220 ILCS 5/16-115A].
"Retail Electric Supplier" or "RES" shall mean either:

"Retail Customer" or "Customer" shall have the same meaning as that stated in Section 16-102 of the Public Utilities Act [220 ILCS 5/16-102].

Section 453.20 Criteria by Which to Judge the Validity of an Electronic Signature

a) An Electronic Signature should indicate who signed the LOA.

   1) A security procedure shall require unique and private information from the signer. This information may include:
      A) Algorithms or codes;
      B) Identifying words or numbers previously established or sent to signer’s registered e-mail account; and
      C) Credit card verification.
      This information may not include information that is also necessary to effect a switch of RESs.

Section 453.40 Additional Requirements for an Electronic LOA

a) In addition to the information and structure set out for a LOA in 815 ILCS 505/2EE, by virtue of being in electronic form, an electronic LOA must provide the following additional information:
   1) The means by which any future correspondence between the Customer and RES will be sent;
   2) Whether the Customer has the option to receive correspondence via the United States Postal Service or electronic means;
   3) That the customer may opt to receive a written copy of the contract; and
   4) A conspicuous statement, within the body of the electronic version of the contract, that residential customers may cancel the enrollment within 3 business days after the Internet Enrollment.

b) In addition to the procedures set out for a RES in Section 2EE of the Consumer Fraud and Deceptive Business Practices Act [815 ILCS 505/2EE], the RES also must abide by the following procedures when utilizing electronic LOAs:

The proposed rules delineate the Commission’s authority to assess fines, penalties, or impose other enforcement mechanisms. Carriers must update their maintenance plans regularly. The proposals require the use of the National Electric Safety Code standards for central office
electrical equipment and various backup procedures are specified for equipment databases. Central office batteries must be maintained in accordance with the Institute of Electrical Engineers standards.

Changes are suggested to trunking standards to bring them up to date and a new calculation methodology is proposed for trunk performance.

The out of service > 24 hours calculation is described as will be discussed later is a contested issue. The calculation requires many considerations and utilizes 10 variables.

Another contested issue is the requirement that carriers have Network Interface Devices in place by December 31, 2002. Other contested issues include additions to answer time, records to be maintained, corrective action to be taken, record keeping and reporting of installation performance.

New standards for customer notification and scheduling are proposed, as well as efforts to notify the customer. Installations standards and deviations from those standards are also proposed.

Completely new standards for trouble reports, recording and reporting of trouble reports and repeat trouble reports are proposed. Also included is additional information that is to be maintained by the carriers. A new section for Network Outages is proposed to provide more detail to the Commission.

This Part shall only apply to the relationship between a serving local exchange carrier and its end user customer only. This Part shall not be applicable to the relationship between a serving local exchange carrier subject to this Part and any local exchange carrier that provides wholesale facilities or services to another serving local exchange carrier for provisioning of services provision to its retail end user customers.

b) This Part does not supersede the authority of, nor prohibit, the Commission from imposing different, additional, or more stringent service quality standards, reporting requirements or penalties upon a carrier pursuant to 220 ILCS 5/13-506.1, Alternative forms of regulation for noncompetitive services.

Section 730.105 Definitions

As used in this Part, the following terms shall have these definitions:

"Abandoned call" means a call that has been offered to a communications network or telephone system that was terminated by the person originating the call before it was answered by the entity being called.

"Access line" means the connecting facility between a customer's premises network interface device and the local exchange carrier's facility that provides access to the switching network for local exchange and interexchange telecommunications service. This includes the network interface or equivalent,
NOTICE OF PROPOSED AMENDMENTS

the outside plant facilities, the office frame and frame wiring and the office line termination.

"Analog" means a continuous electrical signal that carries information by means of variations in its amplitude or frequency. The electrical signal being transmitted varies in direct relation to the signal generated by the source.

"Answer time" means a measurement in seconds from the point the carrier's telephone system receives the call until the call is answered by the carrier's representative or voice response unit and ready to accept information. In the case when the carrier uses a menu-driven system, the measurement begins once the menu-based system has transferred the customer into the carrier's telephone system until the call is answered by the carrier's representative.

"Answer time" means a measurement from the point a call is placed in the answering queue.

"Application" means a verbal or written request for a telecommunications service.

"Appointment" means an arrangement made by a telecommunications carrier to meet a customer within an agreed 4 hour window, or, until June 30, 2003, between 8 A.M. and 4 P.M. on a particular day if the carrier uses the resold services, network or network elements of another carrier to provide service to the customer, at the customer's premises, to perform work on the network.

"Assistance calls" means calls in which the operator provides assistance or instructions to the customer. Examples: rate quotes, credit requests, trouble reports, dial assistance, and dialing instructions.

"Basic local exchange service" means residential and business lines used for local exchange telecommunications service as defined in Section 13-204 of the Public Utilities Act [220 ILCS 5/13-204], excluding: services that employ advanced telecommunications capability as defined in Section 706(c)(1) of the federal Telecommunications Act of 1996; vertical services; company official lines; and records work only. [220 ILCS 5/13-712(b)(2)]

"Business office" means those offices of the company where calls are answered and made. A business office typically employs company representatives to assist customers for order entry and lookup on customers' orders and account records through the use of a computerized system.

"Call data" means the recorded information necessary to measure and bill each call.

"Calls" means customers' messages attempted.

"Central office" means the site where switching equipment is located. A local central office, also called an end office, is the switching office where individual subscribers' access lines appear. It houses the equipment that receives calls transmitted on the local loop and routes the call over the switched network either directly to the person called, if the call is placed to a location served by the same local central office, or to another central office, if the call is placed to a customer served by a different central office. Each central office serves local loops in an exclusive geographic area.

The term “emergency situation” shall not include:

- a single event caused by high temperature conditions alone; or
- a single event caused, or exacerbated in scope and duration, by acts or omissions of the local exchange carrier, its agents, employees or contractors or by the condition of facilities, equipment, or premises owned or operated by the local exchange carrier; or
- any service interruption that occur during a single event listed in this definition but are not caused by those single events; or
- a single event that the local exchange carrier could have reasonably foreseen and taken precaution to prevent; provided, however, that in no event shall a local exchange carrier be required to undertake precautions that are technically infeasible or economically prohibitive.

"Information call" means a call in which a customer will be connected to an information bureau by dialing the proper service code or number and will be given the directory number of the customer whom he desires to call, provided that the customer's number to be called is or will be published or listed in the information records. An "information call" is also referred to as directory assistance.

"Inside wire" means the same as "customer premises wire" defined above.

"Installation trouble report" means any network trouble report filed within seven days after the completion of a basic local exchange service installation on the same line.

"Network service" means a telecommunications service that links two or more discrete channels for the purpose of creating a point-to-point connection.

"Noise to Ground (Ng)" means the noise measured between ground and the tip and ring conductors. The customer does not hear the noise to ground, but the amount of noise to ground affects the amount of noise metallic which a customer hears.

"Noise Metallic (Nm)" means the noise measured across the tip and ring of a circuit and is the noise that the customer hears.

"Operator number identification" means a service provided by an intercept operator on calls that originate from a telecommunications office that is not equipped for automatic identification of the called number.

SUBPART E: STANDARDS OF QUALITY OF SERVICE

Section 730.510 Answering Time

a) Operator Offices
   1) Operator offices shall be staffed so that the average answer time, calculated on a monthly basis, shall not exceed ten seconds for the following types of calls:
      A) toll and assistance; and
      B) information.
   2) Whenever the average answer time for either toll and assistance calls and/or information calls, calculated on a monthly basis, exceeds ten seconds, the local exchange carrier shall take corrective action and report such action to the Commission within 15 business days after the end of the month in which the violation occurred.

b) Business and Repair Offices
   1) Business offices (during normal business hours) and repair offices shall be staffed so that the average answer time, calculated on a monthly basis, shall not exceed 60 seconds. Section 730.525 Transmission Requirements

Local exchange carriers shall furnish and maintain plant, equipment, and facilities to meet the following minimum transmission standards. d) Transmission loss in analog interoffice trunks shall be engineered not to exceed 7 dB. If the loss exceeds expected design loss by $+ \text{ or } -3.5$ dB, it shall be corrected to within 1 dB of the design loss.

e) Transmission loss on analog toll terminating trunks shall be engineered not to exceed 4 dB. If the loss exceeds expected design loss by $+ \text{ or } -3.5$ dB, it shall be corrected to within 1 dB of the design loss.

f) Transmission loss on all digital interoffice trunks shall be engineered and maintained not to exceed 6 dB.

g) Loop current shall be maintained at 20 milliamperes or greater.

\[
(a) - \frac{(c+d+e+f+g+h+i)}{100} = O \quad \text{or the "adjusted number of out of service conditions not installed beyond 5 business days"}
\]

\[
(b) - \frac{(c+d+e+f+g+h+i)}{100} = P \quad \text{or the "adjusted number of out-of-service calls"}
\]

Calculation A  
(Official Calculation Methodology)

\[
\frac{O}{P} \times 100 = x
\]

Calculation B  
(Reported to Staff Upon Request)

\[
\frac{O + (h)}{P + (h)} \times 100 = x
\]

\[
(100 - x) = \text{percent not repaired within 24 hours}
\]

Variables used in the above formulas are defined as follows:

\[
a = \text{Total Number of Out of Service Conditions Not Repaired Within 24 Hours}

4) **Statutory Authority:** Implementing and authorized by Section 13-517 of the Public Utilities Act. [220 ILCS 5/13-517]

5) **A Complete Description of the Subjects and Issues Involved:** On June 29, 2001, the Governor signed into law PA 92-0022. Among other things, PA 92-0022 added Section 13-517 of the Public Utilities Act. Section 13-517(a) requires that every Incumbent Local Exchange Carrier (ILEC) offer or provide advanced telecommunications services to not less than 80% of its customers by January 1, 2005. Advanced telecommunications services are defined as services that are capable of supporting, in at least one direction, transmission speeds in excess of 200 kilobits per second (kbps) to the network demarcation point at the customer’s premises. Section 13-517(b) authorizes the Commission to grant full or partial waivers of this requirement to any ILEC that demonstrates that compliance with Section 13-517(a) would be “…unduly economically burdensome or technically infeasible or otherwise impracticable in exchanges with low population density”. Section 13-517(b) also authorizes the Commission to establish by rule standards for the grant of any full or partial waiver of the requirements of Section 13-517(a).

Terms used in this Part have the following meanings:

"Act" means the Public Utilities Act [220 ILCS 5].

“Advanced telecommunications services” means services capable of supporting, in at least one direction, a speed in excess of 200 kilobits per second (kbps) to the network demarcation point at the subscriber’s premises. [220 ILCS 5/13-517(c)]

"Commission" means the Illinois Commerce Commission.

“Customer” means a customer of an incumbent local exchange carrier (ILEC) that is an end user (as defined in Section 13-217 of the Act [220 ILCS 5/13-217]) provided with a telecommunications service by either the ILEC or by another local exchange carrier through network facilities of the ILEC, provided that the network facilities of the ILEC utilized by the other local exchange carrier are capable of delivering advanced telecommunications services. An end user provided telecommunications service at multiple locations is considered a customer at each location.

“Incumbent local exchange carrier” or "ILEC" means the same as the term is defined in Section 13-202.5 of the Act [220 ILCS 5/13-202.5].

Section 733.30 Provision of Advanced Telecommunications Services

Every ILEC shall offer or provide advanced telecommunications services to not less than 80% of its customers by January 1, 2005. [220 ILCS 5/13-517(a)]

Section 733.40 Monitoring

a) Every ILEC shall report to the Commission information concerning its deployment of advanced telecommunications services. The required information shall be provided annually by March 1. The information provided shall include:

1) The total number of customers of the ILEC;
2) The total number of ILEC customers offered advanced telecommunications services;
3) The total number of ILEC customers actually provided advanced telecommunications services;
NOTICE OF PROPOSED RULES

4) A description of all technologies used to offer or provide advanced telecommunications services;
5) The number of ILEC customers offered advanced telecommunications services identified by each technology, where more than one technology is employed; and
6) The number of ILEC customers actually provided advanced telecommunications services identified by each technology, where more than one technology is employed.

b) The requirements of subsection (a) shall not apply to an ILEC that has been granted a full waiver of the obligations of Section 13-517(a) of the Act for the duration of the waiver.

c) An ILEC may petition the Commission for a waiver of subsection (a) upon demonstration it has satisfied the obligations of Section 13-517(a). An ILEC that demonstrates in that proceeding that it satisfies the obligations of Section 13-517(a) of the Act shall be granted a waiver of subsection (a).

SUBPART B: WAIVERS

Section 733.100 Waiver

a) The Commission is authorized to grant a full or partial waiver of the requirements of Section 13-517(a) of the Act upon verified petition of any ILEC that demonstrates that full compliance with the requirements of Section 13-517(a) of the Act would be unduly economically burdensome or technically infeasible or otherwise impractical in exchanges with low population density. Notice of any such petition must be given to all potentially affected customers. If no potentially affected customer requests the opportunity for a hearing on the waiver petition, the Commission may, in its discretion, allow the waiver request to take effect without hearing.

b) The Commission shall grant such petition for waiver to the extent that, and for such duration as, the Commission determines that such waiver:

1) is necessary:
   A) to avoid a significant adverse economic impact on users of telecommunications services generally;
   B) to avoid imposing a requirement that is unduly economically burdensome;
   C) to avoid imposing a requirement that is technically infeasible; or
   D) to avoid imposing a requirement that is otherwise impractical to implement in exchanges with low population density; and

2) is consistent with the public interest, convenience, and necessity. [220 ILCS 5/13-517(b)]
Section 733.110 Notice of Application for Waiver

An ILEC seeking a full or partial waiver of the requirements of Section 13-517(a) of the Act shall notify all potentially affected customers in its service area. Notification shall be made via a direct mailing to all potentially affected customers of the ILEC prior to the filing of a petition. Section 810.37 Definitions for Site Specific Sportfishing Regulations
DEPARTMENT OF NATURAL RESOURCES

NOTICE OF PROPOSED AMENDMENTS

a) Site Specific Regulations are listed by water area affected. The coverage of the regulation is dictated by the extent of the water area listed and not by the county. In some cases, regulations for a given water area or site may extend beyond the counties listed. The counties listed refer to the location of the dam or outfall for impoundments or mouths of small streams. Since large rivers or streams usually flow through many counties, the term "Multiple" is used rather than listing all counties where the large stream or river flows.

b) The subsections listed below are referred to by number in Section 810.45. Each water area listed in Section 810.45 has numbers in parenthesis which explain all of the definitions in this Section which apply to that water area.

It is illegal to use stakes to anchor any trotlines; they must be anchored only with portable weights and must be removed on the last day they are used. The taking of carp and buffalo with bow and arrow is permissible.

5) Except that sport fishermen may take carp, carpsuckers, buffalo, gar, bowfin and suckers by pitchfork, gigs, bow and arrow or bow and arrow devices.

c) It is unlawful to transport, ship, or convey live trout, salmon, or char into the State unless a salmonid import permit has been issued to the source hatchery, as required by Section 10-105.21 of the Fish and Aquatic Life Code [515 ILCS 10-105] of 1971 (Ill. 2) The Department recognizes persons inspecting hatcheries using the methods of diagnosis found in "Suggested Procedures for the Detection and Identification of Certain Finfish and Shellfish Pathogens" 4th ed., Version 1 (1994), "Procedures for the Detection and Identification of Certain Fish Pathogens" (1985) published by the Fish Health Section of the American Fisheries Society or the "Manual of Compliance to the Fish Health Protection Regulations of the Department of Fisheries and Oceans, Canada (1988), (no further amendments or editions are included), as competent in the diagnosis of fish diseases, unless a clearcut conflict of interest exists. (such as the inspector being related to the hatchery owner by blood, adoption, marriage or economic interest).

d) No live aquatic life not on the Aquatic Life Approved Species List produced at the facilities operated or owned by an aquaculture permit holder may be removed from the site unless they are being transferred to another permit holder who has permission to possess them, or to a fish market as food, or to an aquarium shop.
